🎓 EDUCATION

Sup Galilée School of Engineering

2023 – 2026

Computer Science Engineering Degree

Paris, France

Courses : Numerical Methods, Data Structures, Probability and Statistics, Object-Oriented Programming, C/C++, Python, SQL, Data Mining, Web, Complexity, Compilation, Cloud Computing, Cybersecurity

Sorbonne Paris Nord University

2021 – 2023

Preparatory Class at Sup Galilée School of Engineering

Paris, France

Courses : Algebra, Analysis, Topology and Differential Calculus, Scientific Computing, Algorithms, UNIX systems

Phymly High School

2016 – 2021

Specialized Mathematics, Physics, and Computer Science

Cherkasy, Ukraine

🏢 WORK EXPERIENCE

Internship at Société Générale Insurance

2023 – 2026

Data Engineer / MLOps

Paris, France

- Built internal **VSCode extensions (TypeScript)** to streamline data scientists' workflows on the internal Data Science Platform
- Designed **Callbot performance dashboards (Apache Superset)** with custom KPIs to track system efficiency and adoption
- Analyzed **Zaion Callbot** recognition errors (**Python**) by comparing operational datasets — identified root causes and delivered improvement recommendations
- Built an automated **data migration pipeline (Python, AWS S3)** to transfer SAS datasets to cloud storage, improving scalability and access
- Improved internal **credential management tool (Python, JS)** to simplify access administration for platform users

Course at IT Company SPD Ukraine

2021

Machine Learning / Deep Learning

Cherkasy, Ukraine

Core Tools & Libraries : Scikit-Learn – Pandas – Numpy – KNN – XGBoost

📁 IT PROJECTS

Logistics Center Placement | *Python, Julia, CPLEX, Optimization*

2025

Combinatorial optimization project on logistics center placement using MILP models solved with CPLEX, greedy heuristics and stochastic local search, with experiments on French city datasets and interactive visualizations

Reaction System | *Haskell*

2024

Representing reaction systems and processes using functional programming

Traveling Salesman Problem | *C, Reinforcement Learning*

2023

Implementing the Ant Colony Optimization Algorithm

Publication an Article | *Mathematics Algorithms*

2021

Method of Pulse Noise Filtration in Video Images (D.Palahin, V.Palahin, O.Zorin, O.Hozhyi)

Informatics and Mathematical Methods in Simulation, Vol. 11 (2021), No. 4

Anomaly Detection Methods | *Python, Machine Learning*

2020

Methods for Partial Data Labeling

Filtering Images | *HTML, CSS, JS, Algorithms*

2019

Implementing Mathematical Methods for Noise Filtering in Digital Images as an Internet Service

📄 CERTIFICATIONS

⚙️ SKILLS

- **Huawei** : Artificial Intelligence and Applications
- **Huawei** : Artificial Intelligence Technology and Applications
- **SPD Ukraine** : Course in Machine Learning at an IT company
- **Stepik** : Course in Machine Learning
- **ML / DL** : Scikit-learn, TensorFlow, Keras, XGBoost, LightGBM, CatBoost
- **Data Analysis** : Pandas, Numpy, Matplotlib, Seaborn, Plotly, Tableau, Power BI
- **Languages** : Python, C/C++, Java, SQL, HTML, JS/TS, Matlab, Haskell, Julia, LaTeX
- **Tools** : VSCode, Jupyter, Anaconda, Git, Docker, Linux, Windows, MacOS

🏆 AWARDS & PARTICIPATIONS

🗨️ LANGUAGES

Recipient of the Georges Besse Foundation

Ukrainian Native **Russian** Bilingual

Eco – Techno Ukraine ISEF

French Fluent **English** Fluent

1st place in the **Computer Science** category at the international competition

★ INTERESTS

Collective Intelligence Internet Service

📈 Trading 🪙 Crypto ♟️ Chess 🎿 Skiing

1st place in Ukraine
