📁 PROFESSIONAL EXPERIENCE

Data Engineer / MLOps (Work-study) — Société Générale Assurances

09/2023 – Present

La Défense, France

- Development and deployment of **3 VS-Code extensions** to simplify the use of internal tools on the **Data platform** and improve workflow efficiency for **30+ users (Data Scientists & Data Analysts)**
– *TypeScript · Python · JSON · Bash · Linux · Git · VS-Code*
- Design and deployment of a **Zaion Callbot monitoring dashboard** to track **10+ operational KPIs** and analyze system performance for internal teams
– *Apache Superset · PostgreSQL*
- Data analysis on recognition errors of the **Zaion Callbot** based on **1 year of operational data** to evaluate **system effectiveness** and identify the main causes of errors, leading to **3 improvement recommendations**
– *Python · Pandas · NumPy · Matplotlib · Seaborn · Plotly · Jupyter Notebook · Conda*
- Design and automation of a **data migration pipeline** enabling the transfer of **500+ GB of SAS datasets to AWS S3**, in order to improve **scalability, access, and data processing** for Data teams
– *Python · AWS S3 · fsspec · smbfs · Linux · Bash*
- Improvement of an **internal access management tool** to simplify the administration of **user rights** for **30+ users** in Data teams
– *Python · JavaScript · API · Git*
- Maintenance and update of **35+ internal extensions** as well as **code-server versions** to ensure the **stability and compatibility of the development environment** used by **40+ users** in Data teams
– *Linux · Bash · VS Code · code-server · Git*

Training at IT Company SPD Ukraine — Machine Learning / Deep Learning

2022

– *Scikit-Learn · Pandas · NumPy · Matplotlib · Seaborn · TensorFlow · XGBoost*

Cherkasy, Ukraine

📁 IT PROJECTS

- **Logistics Center Placement** | *Python, Julia, CPLEX, Optimization* **2025**
Combinatorial optimization project for logistics center placement using MILP models solved with CPLEX and heuristics
- **Reaction System** | *Haskell* **2024**
Representation of reaction systems and processes using functional programming
- **Traveling Salesman Problem** | *C, Reinforcement Learning* **2023**
Implementation of the ant colony optimization algorithm
- **Publication of an article** | *Mathematical Algorithms* **2021**
Method of pulse noise filtration in video images (D.Palahin, V.Palahin, O.Zorin, O.Hozhyi)
Informatics and Mathematical Methods in Simulation, Vol. 11 (2021), No. 4
- **Anomaly Detection** | *Python, Machine Learning* **2021**
Methods for partial data labeling

🎓 EDUCATION

Sup Galilée Engineering School — Engineering Degree in Computer Science

2023 – 2026

Courses : Cloud Computing, Data Mining and Programming for AI, Databases (MySQL) and NoSQL, Docker, Probability and Statistics, Linear and Combinatorial Optimization, Parallel and Distributed Algorithms, Graph Algorithms, and others

Sorbonne Paris Nord University — Preparatory Class for Sup Galilée

2021 – 2023

Courses : Algebra, Analysis, Topology and Differential Calculus, Scientific Computing, Algorithms, UNIX Systems

📁 CERTIFICATIONS & SKILLS

- **Huawei** : Artificial Intelligence and Applications | *Scikit-Learn, TensorFlow, Keras, XGBoost, LightGBM*
- **Huawei** : Artificial Intelligence Technology and Applications | *Pandas, Numpy, Matplotlib, Seaborn, Plotly, Tableau*
- **Languages & Tools** Python, C/C++, Java, SQL, HTML, JS/TS, Matlab, Haskell, Julia, LaTeX, VSCode, Jupyter, Anaconda, Git, Jira, Docker, Linux, Windows, MacOS

🏆 AWARDS & PARTICIPATIONS

- **Georges Besse Foundation Laureate**
- **Eco – Techno Ukraine ISEF** — 1st place in Computer Science & **Collective Intelligence Internet Service** — 1st place in Ukraine
